IT INFRASTRUCTURE / DATABASE ADMINISTRATION / SYSTEMS & DATA ENGINEERING

ORACLE 11G/12C · RHEL · VMWARE · INFORMATICA

ichean92@gmail.com Jakarta & Bogor area, Indonesia

§01 PROFILE

I run the layer under the applications. Ten years of Oracle and MySQL databases, Linux and Unix servers, VMware virtualization, enterprise storage, and the middleware and ETL pipelines that sit on top.

Day to day that means sizing server and storage infrastructure against what the application and database actually need, then carrying it through installation, migration, upgrade, and tuning until it is stable enough to hand to the operations team.

I have led teams of system administrators and database specialists, written the technical proposals behind projects we won, and spent plenty of time on the unglamorous half: preventive and corrective maintenance, incident troubleshooting, RCA, firmware and patching, and the documentation that lets the next person pick a system up without calling me first.

§02 CAPABILITIES

DATABASE ADMINISTRATION

Oracle 11g/12c, Oracle Spatial, MySQL, RMAN, Data Pump, database migration, backup and recovery

SYSTEMS ADMINISTRATION

RHEL, CentOS, Ubuntu, Solaris, Windows Server, OS hardening, kernel and resource tuning

VIRTUALIZATION & CONTAINERS

VMware ESXi/vCenter, Oracle VM, Docker Engine, Docker Swarm, Red Hat OpenShift

DATA ENGINEERING & MIDDLEWARE

Informatica Server/DEI, ETL workflows, data pipelines, Oracle WebLogic, MDM environments, TigerGraph

SERVERS & STORAGE

HPE ProLiant, Dell PowerEdge/PowerVault, Lenovo ThinkSystem/Storage, Oracle, Cisco UCS, Supermicro, enterprise storage, RAID, SAN, Eaton UPS

PROJECT DELIVERY

Solution architecture, technical proposals, project planning, UAT, risk and rollback planning, documentation, BAST and customer handover

OPERATIONS

Preventive and corrective maintenance, incident troubleshooting, RCA, firmware and patching, performance monitoring

§03 EXPERIENCE

01 **Infrastructure Project Engineer** 2025 – Present

YASATECH SINERGI INSPIRASI

- Design server and storage infrastructure aligned with application and database requirements, with focus on performance, scalability, and reliability.
- Monitor project execution, scope, schedule, delivery logistics, documentation, UAT, and formal customer handover/BAST.
- Prepare technical designs, implementation reports, and operational handover documentation.

---

02 **Customer Success Team** 2025

KOKUSAI DENSHIN DENWA INDONESIA

- Cleaned up the patching backlog: ESXi upgrades on Dell PowerEdge and HPE ProLiant hosts, hardware swaps, and the post-change validation.
- Ran health and performance checks on the server fleet and wrote up what needed replacing.

---

03 **Leader of Data Enterprise** 2025

TRINET PRIMA SOLUSI

- Ran proof-of-concept and delivery work with two system administrators and two database specialists reporting in.
- Wrote the tender proposals and cost estimates for deals we won, then owned the implementation schedule.

---

04 **Leader of Data Enterprise** 2019 – 2025

PRIMA INTEGRASI NETWORK

- Six years leading the data team: solution design, proof of concept, architecture, and the day-to-day work of getting it installed.
- Held the technical relationship with clients across banking, government, and energy accounts.

---

05 **System Administrator** 2019

ALL DATA INTERNATIONAL

- Managed server and storage setup, including data-center hardware installation, operating-system deployment, and VMware virtualization installation.

06 **Database Administrator** 2015 – 2019

PRIMA INTEGRASI NETWORK

- Installed and configured operating systems and databases, and performed database migration, backup, and restore activities.

07 **IT Administrator** 2014 – 2015

ASURANSI BUMIPUTERA

- Managed insurance policy data entry and storage in the Bumiputera application and MySQL database.

§04 SELECTED PROJECTS

CLIENT WORK, 2016 – 2025

YEAR	ENGAGEMENT	ROLE
2025	PRJ-01 · Government **Integrated Control System, Ministry of Coordinating Affairs** - Designed the integrated system architecture: hardware sizing, network topology, redundancy, and supporting infrastructure. - Led customer technical presentations, project kickoff, schedule control, installation and configuration, testing, and handover. - Installed and configured HPE ProLiant DL380 Gen12, Eaton 9PX 5KVA UPS, and Dell PowerVault ME5224 storage, including RAID, provisioning, host mapping, and validation.	PROJECT MANAGER & TECHNICAL SOLUTION
2025	PRJ-02 · Manufacturing **Yamaha Indonesia Motor Manufacturing — server maintenance** - Prepared infrastructure health and performance reports. - Executed VMware ESXi upgrades, hardware diagnostics and replacement, validation, and documentation.	SERVER ENGINEER
2025	PRJ-03 · Air cargo logistics **Enterprise infrastructure support, Japanese airline cargo environment** - Performed preventive and corrective maintenance on Dell PowerEdge servers and troubleshooting across the server and virtualization layers. - Hardware replacement, monitoring, scheduling, RCA, and operational handover.	SERVER ENGINEER

YEAR	ENGAGEMENT	ROLE
2023–24	PRJ-04 · Banking **Bank Rakyat Indonesia — TigerGraph database for AML** - Installed and configured Ubuntu 20, TigerGraph Database, Docker Engine, and Docker Swarm; performed upgrades, optimization, monthly maintenance, and reporting.	LEADER, DATA ENTERPRISE
2023–24	PRJ-05 · Government **BKKBN — ETL platform** - Installed and configured Ubuntu 20, TigerGraph Database, and a Docker Swarm environment; performed upgrades, maintenance, and reporting.	LEADER, DATA ENTERPRISE
2020–24	PRJ-06 · Government **Jakarta Smart City — data engineering transformation** - Installed and optimized RHEL 7.4 and Informatica Server 10.2.0 Hotfix1. - Troubleshooting, ETL performance tuning, upgrade to Informatica 10.4, maintenance, and reporting.	LEADER, DATA ENTERPRISE
2019	PRJ-07 · Energy **Perusahaan Gas Negara — enterprise ETL re-engineering** - Implemented RHEL 7.1/7.2 and Informatica Server 10.2.0 Hotfix1. - Tuning, troubleshooting, log analysis, connectivity and stability resolution, and maintenance.	SYSTEM ADMINISTRATOR
2019	PRJ-08 · Enterprise **Corporate application virtualization** - Installed Lenovo ThinkSystem SR530, Lenovo Storage V3700 V2, VMware 6/vCenter 6, SAN switch zoning, and RHEL 7.1.	SYSTEM ADMINISTRATOR

YEAR	ENGAGEMENT	ROLE
2018	PRJ-09 · Enterprise **New data center and disaster recovery center, Jalur Eka Nugraha** - Installed and configured Cisco UCS-240-M4, RHEL 6.7, MapR cluster, and NFS storage integration. - Performed RAID card and mainboard replacement.	SYSTEM ADMINISTRATOR
2016–18	PRJ-10 · Multi-client **Oracle database and infrastructure projects** - Delivered Oracle 11g/12c installations and migrations across RHEL, Oracle Linux, and Solaris environments. - Implemented Oracle Spatial, Oracle VM, SAN infrastructure, and Oracle Fusion Middleware Identity Management.	DATABASE ADMINISTRATOR

§05 TRAINING

COURSES AND CERTIFICATIONS COMPLETED

YEAR	COURSE	PROVIDER
2014	Oracle Database Administrator 10	LPK GUNADARMA
2015	Oracle Database Administrator 12c	ORACLE UNIVERSITY
2015	Oracle Spatial 12c	ORACLE UNIVERSITY
2017	Introduction to MapR	MAPR INSTITUTE
2019	SysAdmin Informatica Big Data	INFORMATICA UNIVERSITY
2012	Building Internet Server with Linux System	LPK GUNADARMA
2012	Introduction to XML	LPK GUNADARMA

§06 EDUCATION

DEGREE

Bachelor of Informatics Engineering

INSTITUTION

Gunadarma University

YEARS

2009 – 2013

§07 CONTACT

EMAIL

ichean92@gmail.com

LOCATION

Bojong Gede, West Java, Indonesia

OPEN TO

Jakarta and Bogor. Infrastructure, database, and platform engineering roles.
